Supplier Quality Notification

Production Part Approval Process- Level IV

To our Valued Suppliers:

BAE Systems Combat Mission Systems would like to send you advanced **notification** of a new contract requirement being levied on BAE Systems from our Customer. This new requirement is for a Production Part Approval Process (PPAP), Level IV. The PPAP Level IV requirement will be flowed down to you in future contracts by the addition of a Contracts Deliverable Requirement (CDR) attached to your purchase order. This Level IV PPAP requirement will be added to future Bradley, AMPV and PIM Contracts at a minimum.

This is a Customer driven initiative that has already been adopted across various BAE Systems Divisions and Platforms. In preparation, BAE Systems will be providing training and workshops for the Level IV PPAP including PFMEA/Control Plan training. The first training class will start on April 6, 2021.

If you or your organization would like to learn more or attend a BAE Systems Supplier PPAP Training Session, please contact:

Chad Lemmons
BAE Systems - Supplier Development Manager
